### **DETAILED ACTION**

Claims 1-10, 12-24, 26-38, and 40-42 have been examined.

#### ***Allowable Subject Matter***

Claims 1-10 and 12-14 are allowed.

Claims 15-24 and 26-28 are allowed.

Claims 29-38 and 40-42 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Vandyk ("No Entry"), discloses a method for facilitating international travel, the method comprising: creating a travel record; creating in dependence upon the travel record, an immigration admissions form for a destination country; and submitting the immigrations admissions form to an immigration admission forms database for the destination country (three paragraphs beginning from "The Blue system differs from the Green"). Vandyk does not disclose that the travel record is stored on or within an international travel server, or that the travel record is created in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, but does disclose transmitting passenger information electronically (ibid.). Vandyk discloses validating a travel record against enforcement data in databases (three paragraphs beginning from "The Blue system differs from the Green"), and therefore, by implication, against admissions rules stored in an admissions rules database (in the sense that "Don't admit identified criminals or persons with incorrect

Art Unit: 3625

documents" is an admission rule). It is well known to communicate signals through internet enabled devices coupled for data communications through at least one internet connection to a server (e.g., any sort of client, such as a PC, communicating with an Internet server). However, Vandyk does not disclose the travel server, separately from any immigration computer of the destination country, validating travel described in travel records against admission rules stored in admission rules databases, nor does any other prior art of record. In Vandyk, such validation is carried out by the Customs Service and/or other authorities based on information received from what may be considered a travel server. Validating data or plans, as such, is known, but that is held not sufficient to make the particulars of validating travel against admission rules in context obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Note Regarding Information Disclosure Statements***

The examiner has signed off on the IDS statements filed August 3, 2001 (Document #4) and November 13, 2001. The examiner previously signed off on these IDS's, and made them of record in the Office action mailed September 29, 2004. However, as the initialed and signed IDS's appear not to be present in the electronic file wrapper, they have been made of record once again.

***Conclusion***
